

"We came back for the *value.*"

Like most businesses today, we're looking for ways to cut costs while continuing to give uncompromised service to all our customers. Our automated phone service is just one of many call items offered by Call America. As our golf courses have expanded, Call America has been with us every step of the way, providing best-of-edge services with a highly personal (yet, "total consistency") feel that has always set them apart.

"I came back for the *commitment.*"

I value Call America's commitment to non-profits, going back to 1993 when they first opened their doors. I came back because the owners, the president, and the staff all live right here on the Central Coast. And when I call, I talk to a real person."

Frank LaRocca, CEO

"We came back for the *service.*"

Service with our former carrier was terrible. We were tired of being ignored. We came back because Call America cares about its clients. They listen to our issues. We wouldn't even consider anyone else.

"We came back for the *customer confidence.*"

As a company with multiple offices throughout the county, our telecommunications needs are a bit more complicated than most. Call America offered ways to simplify our service and areas to that cut one client call step through the cracks. That's worth a lot to us.
